						Representativity	Relative Surface	Conservation	Global
3170			0.05			C	C	A	A

PF: for the habitat types that can have a non-priority as well as a priority form (6210, 7130, 9430) enter "X" in the column PF to indicate the priority form.

NP: in case that a habitat type no longer exists in the site enter: x (optional)

Cover: decimal values can be entered

Caves: for habitat types 8310, 8330 (caves) enter the number of caves if estimated surface is not available.

Data quality: G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation)

3.2 Species referred to in Article 4 of Directive 2009/147/EC and listed in Annex II of Directive 92/43/EEC and site evaluation for them

Species					Population in the site					Site assessment				
Group	Code	Scientific Name	S	NP	Type	Size		Unit	Cat.	Data quality	A B C D		A B C

Group: A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles

S: in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

NP: in case that a species is no longer present in the site enter: x (optional)

Type: p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

Unit: i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

Abundance categories (Cat.): C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information

Data quality: G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

3.3 Other important species of flora and fauna (optional)

Species					Population in the site			Motivation							
Group	CODE	Scientific Name	S	NP	Size		Unit	Cat.	Species Annex		Other categories

CODE: for Birds, Annex IV and V species the code as provided in the reference portal should be used in addition to the scientific name

S: in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

NP: in case that a species is no longer present in the site enter: x (optional)

Unit: i = individuals, p = pairs or other units according to the standard list of population units and codes in accordance with Article 12 and 17 reporting, (see [reference portal](#))

Cat.: Abundance categories: C = common, R = rare, V = very rare, P = present

Motivation categories: IV, V: Annex Species (Habitats Directive), A: National Red List data; B: Endemics; C: International Conventions; D: other reasons

4. SITE DESCRIPTION

4.1 General site character

[Back to top](#)

Habitat class	% Cover
N12	73.0
N06	2.0
N08	25.0
Total Habitat Cover	100

Other Site Characteristics

El sitio coincide con la cuenca de recepción de un estanque temporal mediterráneo. Se trata de un pequeño estanque temporal (20m2 aprox) situado en el centro de una parcela de cultivo en tierras arcillosas silíceas. No existe ningún tipo de protección que separe el estanque de las tierras cultivadas.

4.2 Quality and importance

El interés del sitio es básicamente la presencia del estanque temporal. Éste es singular por su situación. Por un lado, se localiza en una zona donde no se conocen más hábitats de este tipo, por otro, limita con una amplia zona forestal, de manera que sirve como abrevadero a la fauna de la zona. En cuanto a biodiversidad, alberga especies vegetales tales como *Callitriche stagnalis*, *Scirpus tabernaemontani*, *Tamarix africana* o *Isoetes durieui*. Además, en el estanque cría *Hyla meridionalis* (amfibio incluido en el anejo IV de la Directiva Hábitats y en el Catálogo Nacional de Especies

Amenazadas). El estanque es utilizado como zona de reposo y abrevadero de numerosas especies de aves y otras especies de interés cinegético. Destaca que en las proximidades del lugar cría y caza *Milvus milvus*, ave presente en el anejo I de la Directiva Aves y considerada en Peligro de Extinción en Baleares.
